Art Unit: 2155

## **DETAILED ACTION**

Page 2

## **Election/Restriction**

- 1. Claims 1-144 are presented for examination.
- 2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
- 1. Claims 1-59 and 87-103 are drawn to a system and method of communicating with an electronic device including an ultrasonic acoustic signal encoded with information, classified in class 340 subclasses 853+, 854+, and 855+; and class 704 subclasses 500+.
- II. Claims 60-86, 104-106, 126-134, and 138-144 are drawn to a system and method of computer system including speech (sound) signal processing, classified in class 704 subclasses 200+.
- III. Claims 107-109 and 135-137 are drawn to a system and method of computer network, classified in class 709 subclasses 200+.
- IV. Claims 110-125 are drawn to a system and method of wireless peripheral for an electronic device, classified in class 455.

Art Unit: 2155

- 3. Inventions (I and II) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the Invention I does not require the system and method of computer system including speech (sound) signal. The subcombination has separate utility such as a system and method of communicating with an electronic device including an ultrasonic acoustic signal encoded with information.
- 4. Inventions (III and IV) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the Invention III does not require the system and method of wireless peripheral for an electronic device. The subcombination has separate utility such as a system and method of computer network.

Application/Control Number: 09/806,618

Art Unit: 2155

Inventions (I, III, and IV) are distinct, each from the other because of the following reasons: The invention recited by the claims 1-59 and 87-103 (Group I) is drawn to a system and method of communicating with an electronic device including an ultrasonic acoustic signal encoded with information. The invention recited by the claims 107-109 and 135-137 (Group III) relates to a system and method of computer network and claims 110-125 (Group IV) relates to a system and method of wireless peripheral for an electronic, which are not related to the system and method of communicating with an electronic device including an ultrasonic acoustic signal encoded with information.

- 6. Inventions (II, III, and IV) are distinct, each from the other because of the following reasons: The invention recited by the claims 60-86, 104-106, 126-134, and 138-144 (Group II) is drawn to a system and method of computer system including speech (sound) signal processing. The invention recited by the claims 107-109 and 135-137 (Group III) relates to a system and method of computer network and claims 110-125 (Group IV) relates to a system and method of wireless peripheral for an electronic, which are not related to the system and method of communicating with an electronic device including an ultrasonic acoustic signal encoded with information.
- 7. Because these inventions are distinct, each from the other for the reasons given above and the inventions have acquired a separate status in the art as shown by their different classifications restriction for examination purposes as indicated is proper.

Page 4

Art Unit: 2155

8. Applicant is required under 35 U.S.C. 121 to elect a single group disclosed as described above for prosecution on the merits because each of the groups requires different search in different class and subclasses.

- 9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(1).

## **Contact Information**

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bharat Barot whose telephone number is (703) 305-4092. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alam, Hosain, can be reached at (703) 308-6662. A central official fax number is (703) 872-9306.
